B Building Repair Delayed by Over a Year Because of Continued Supply Slowdown **Dr. David Sepulveda**

The disability-friendly door on the west side of B Building has remained in disrepair for over a year due to a long delay in the delivery of the needed part.

"The part was ordered over a year ago," said GGC Director of Operations Christopher Smith. "Once it's here, it will be installed."

Smith indicated that pandemic-related supply chain slowdowns continue to affect these kinds of projects even now.

"[The] Facilities [Department at GGC] has seen many delays for certain items," said Smith. The Facilities Department did not give an estimate for when the repair would be complete.
